WEAPONIZED - BORLAND PART 2

Enhanced Transcript with Speaker Names & Timestamps

=====

[00:00] Dylan: Gold, lava, plasma, some type of fluid going over and around the craft.

[00:07] Jeremy Corbell: What is it that you saw and found out and can tell us about?

[00:11] Dylan: I only came for them because I sincerely believed they were going to die. Sucks. I think what we are dealing with is very, very, very old. I think old humans have written those down in religious stories. I think that it's quite clear that we have been influenced by something else. I provided three rudimentary drawings, one of which was unclassified and the other two were immediately thrown into a SAP. And the two that were thrown into a SAP prove we are not alone.

[00:54] Jeremy Corbell: In this episode of Weaponized, you will notice that we chose to censor certain details within Dylan's testimony, most unrelated to UAP. This is to avoid unauthorized disclosures and is subject to an ongoing clearance review. Dylan was given an unauthorized disclosures and is subject to an ongoing clearance review. Only six days to prepare his testimony for Congress. He is currently seeking clarity on being able to publicly discuss certain aspects of his professional experience. What is it that you saw and found out and can tell us about? Well, we can go into it.

[01:29] Dylan: I don't know how much is going to come out. Okay, let's hear it and then we'll figure it out later. So basically, hypothetically speaking, let's say that I claim I saw Bigfoot running around Nevada test range and I saw Bigfoot outside the Starbucks and Bigfoot was wearing a U.S. Air Force uniform. If I said that to Arrow or to the IG, but mainly Arrow, and Arrow comes back and says, and I draw a nice picture of Bigfoot in a pretty Air Force uniform. Let's say Arrow comes back and says, hey, Dylan, you're talking about Starbucks is unclassified. You're talking about Bigfoot in that military uniform. That's TS, no foreign. You are never to say another word about that. That's what Arrow did to me. And they classified everything I brought forward. So you're working for BAE and for somebody else. Yep. For somebody else in the structure of. Multi-agency special access program. Yes, sir. And it's under the umbrella of a private company. The private company is how they are getting us to work there. But it is all under the umbrella of that agency.

[02:34] George Knapp: The information you had about these flying Tic Tac that people are taking down. Do you get that information through your work at BAE?

[02:40] Dylan: There were people who ended up working there with me, who were brought into the legacy program, whose lives were also destroyed. And they believe based off of what I was saying about what I experienced in my life, the triangle, what I knew that to be true at that point, they believe I was read into the program. And they believe that because I was having the clearance issues and the VA issues and everything else, the financial, what they did to me, they were experiencing it too. And there were multiple people who I was. I was working with that were a part of what is conveyed as a legacy program.

[03:14] George Knapp: So you're working at BAE for an agency and on a coffee break or a smoke break, you converse with your coworkers and you tell them about something you've seen and they start sharing information with you.
